## Pioneer Convent

Where curriculum helps in all round development of the student's

*Be strong when you are weak,  
Brave when you are scared,  
And humble when you are victorious.*

These are the golden rules of life. A school is a birthplace of an ideal citizen. It is where we learn to live a life of selfless service on behalf of the community. It is where we find the path to virtue. A school is an institution designed for teaching the students under the guidance of teachers. Pioneer Convent is one such school.

Pioneer Convent was established in the year 1999. It has been a great journey since then with our students. In the guidance of our mentors Shri P.C. Jain, CA Dr. P.K. Jain and Mrs. Ratna Juneja, the school has achieved great heights not only in academics but also in sports and cultural activities. The school has been able to achieve so much because of the management's vision of offering educational services of highest quality. The institution focuses not only on academics but also in the overall development of personality of the students. The curriculum demands from the students to explore their potential and helps them in developing into a confident, committed, knowledgeable and responsible human being.

Pioneer Convent gives the students an opportunity to become physically fit through various kinds of sports. The students have been performing brilliantly every year and have been recognized at every level. The various sports that are available to the students are Basketball, Volleyball, Cricket, Football, Karate etc., Indoor activities like Chess, Table tennis, Badminton etc. The students who are interested in arts, Dance and music are given equal scope and opportunity to show their talent.

It is not possible to give proper guidance to the students if the teachers are not up to the mark, Pioneer Convent gives its teachers an opportunity to attend workshops in their respective fields. There are various workshops held for students as well, wherein experts from outside enlighten the students with knowledge.

The management and teachers strive to make the students fluent in languages. The curriculum is designed in a way to improve the oral, written and listening skills. The focus of the teachers is to make the students

strong conceptually. We try to develop in our students the sense of responsibility towards society and environment. Pioneer Convent provides education to all classes, castes and religion. The school has set high standards academically and the students must achieve it. Pioneer Convent has been recognized from time to time for maintaining the standards and giving strong and capable citizens to the society. We believe that educating both body and soul is important. The true education is when the student realizes the importance of it and its practical usability. It is here that Pioneer Convent plays an important role in providing our students with significant and excellent education.

The school has taken the responsibility of making each and every student a well mannered individual. Academic knowledge is combined with the in-depth knowledge of the values. These values help a child to grow at social, personal, physical and mental level. Our school is a right place for your child where the grooming is done in an atmosphere of love and affection.

It is a proud feeling for all of us in the Pioneer family that we have been able to produce 100% results in the Board Exams of class XII. It is only the hard work of students and the tireless effort of teachers which has brought name and fame to the school. There are some students in class XI who passed their X with 10 on 10 CGPA. We all are moving in a rightful direction to prepare the students to face the competitive world of 21st century.

Pioneer Convent had conducted a Summer Camp last year. There were 23 games that were included and 600 students participated in it. The summer camp is free for all. The games had specific coaches and this helped the children learn the sport or play it correctly. We have planned again for a free summer camp which will be open for children from 1st of May 2015.

Pioneer Convent feels proud to have been a host to the 60th National Sports Championship 2015. We accommodated 3000 students for games like Karate, Softball and Football. This honor and faith was bestowed upon us by respected Collector of Indore and Joint Director, Education Indore.

Day and Night, there's only one thought, somewhere at the back of mind, of all parents that I need a spark in my child. To accomplish this dream they look upon the education system and the educational institutes where the child is able to get an all round development. The expensive, un-affordable fee structure of schools doesn't allow parents to fulfill their dream of making their child "A Complete Man."

There's no choice left, except for settling down for a school which is not able to give proper education as to make him a learner of 21st century.

Apart from bookish knowledge, social skills also matter a lot in the life of a child. They affect the child's esteem, grades and career choice with future relationships. All kids love to talk, feel loved and for that they need to pave way to social skills. A little positive reinforcement from school, his teachers will help him go a long way. We at 'Pioneer Convent' help the child to produce that 'SPARK' in him so that he proves his identity in life.

The child should be taught the random skills of kindness to learn humanity too. He should know what is being 'HUMANITARIAN' and what 'HUMANITY' means. A selfless act of giving resulting in the happiness of others should mean a lot to him. Definitely such things make him a well-rounded individual. We try to teach kindness to every child to activate the areas of brain and heart to make him connected to society with trust. We have proved that such act of kindness encourages their good behavior and they understand each other well. They are well-liked by society. There's one thing which I want to convey to parents, when you select a school for your child's education, don't go for big buildings or heavy fee structure. I am not saying that they are not needed. They are needed, but your child gets lost in the heavy crowd of classrooms. Don't you expect a teacher should pay attention individually towards your child? Ask any teacher, is she able to do justification with your child where 60-70 students are in the class? The simple answer will be 'NO'. As parents decide for a school where the environments is free from stress & tension.
